

THERMO SHUTTERS

Our Thermo Shutters are manufactured from high-quality extruded **PVC**, coated with a two-part water-based polyurethane paint. This coating not only enhances the aesthetic appeal of our shutters but also provides excellent protection against environmental elements, ensuring longevity and performance.

They have a robust aluminum core embedded within their structure, providing unparalleled stability. This innovative design enables the production of larger sizes without the concern of louvers warping, ensuring long-lasting performance and structural integrity.

Add refined elegance to any space, effortlessly combining style and functionality to create the perfect covering for any window or door with our Thermo Shutters.
